Jeppe Hinrichs

Copenhagen, Denmark

Copenhagen, Denmark

J (+45) 81403148 ■ dem16216syh@gmail.com jeppe-h-1710a6a6 s163555

Employment History

2024-now	Electrical Engineer, Research & Development, Sensata Technologies
2021 - 2023	Graduate Researcher, Brain/Biomedical Microsystems Laboratory
2015 - 2017	Electrical Engineer, Development & Engineering, Welltec
2014 - 2015	Intern, Development & Engineering, Welltec

Education

2021 - 2023	Master of Science in Electrical Engineering, Korea Advanced Institute of Science & Technology
2021 - 2023	Master of Science in Electrical Engineering, Technical University of Denmark
2020	Research Student (Exchange), Tokyo Institute of Technology
2018 - 2020	Bachelor of Electrical Engineering, Technical University of Denmark
2013 - 2015	Associate in IT-Technology, Aarhus Business Academy

₹ Selected Projects

- 2023 Master Thesis | LTspice, Altium Designer, MATLAB, Xilinx Vivado, Jupyter
 - Title: Portable ultrasound system for blood velocity estimation
 - Designed system architecture and state machine of Doppler ultrasound imaging device
 - Implemented Zynq 7000 FPGA bitstream for ultrasound pulser control system
 - Implemented MCU/FPGA interconnects, registers and flags and conducted signal propagation analysis
- 2023 A wearable pH sensor based on a flexible charge-coupled device | Nanofabrication
 - pH sensor exceeded Nernst limit by accumulating charges
 - Flexible Schottky-junction control CCD-based
 - Wearable sensor with $\Delta V > 2.5V$ over pH range
- 2022 Biomedical MEMS and Electrical Engineering | MATLAB, Simulink, Coventorware
 - Title: Characterizing a Hydraulic Displacement Amplifier for a Piezoelectric Microvalve
 - Simulation and characterization of piezo-electric actuator platform for microfluidic valve applications
 - Fabrication of MEMS device for validation
 - Achieved high-frequency (1 kHz), high-pressure (300 kPa) and large stroke targets (30 µm)
 - Estimated flow rate at 0.21 mLs⁻¹ with a 1 kHz driving voltage of 500 V peak-to-peak
- 2021 Fabrication of Dopamine Sensor | COMSOL Multiphysics, Nanofabrication, Photolithography
 - Design and simulation of dopamine sensor using simulation software
 - Fabricated sensor from ground-up in a cleanroom environment
 - Using state-of-the-art fabrication machines to validate process and wafer yields
- 2020 High-Speed Convolutional Neural Network Accelerator | Xilinx Vivado, Jupyter
 - Conducted study into training models for machine vision
 - Achieved highly parallelized accelerator that maximizes computational and resource efficiency
 - Implementation of low-resolution CNN inference was 17x in comparison with a baseline

★ Skills

Languages Danish, English, German, Japanese, Korean

Coding </br>
C/C++, Python, Bash, LabVIEW, Assembly, Make

CAE/CAD & Altium Designer, KiCAD, OrCAD, LTspice, Qspice, Simulink, Fusion 360

Technologies Linux, Git, RTOS, Xilinx Vivado, MATLAB, NI-DAQ

Misc. Academic research, teaching, training, microcontrollers, computer hardware, exercise, music

Miscellaneous Experience

2023 Scholarship Award, from Siemens Foundation for research project funding at KAIST in South Korea

2020 Scholarship Award, from Scandinavia-Sasakawa Foundation for research project at Tokyo Institute of Technology in Japan
